

IBM Security Access Manager is a modular, integrated access management appliance that helps secure access to web, mobile, and cloud workloads.

IBM Security Access Manager allows organization to take back control of their access management system with a single integrated platform that manages access across many common scenarios. Access Manager helps secure access points into the corporate network and enforce risk-based access policies that define who and what can access protected resources

Highlights:

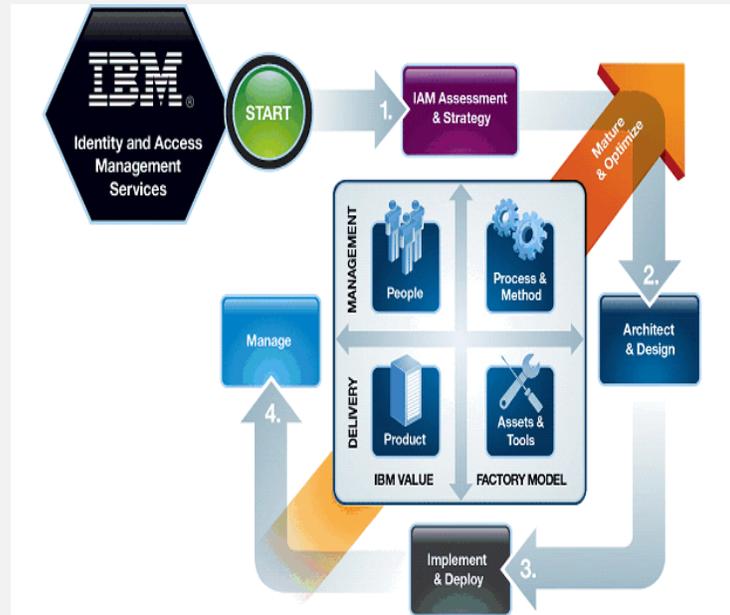

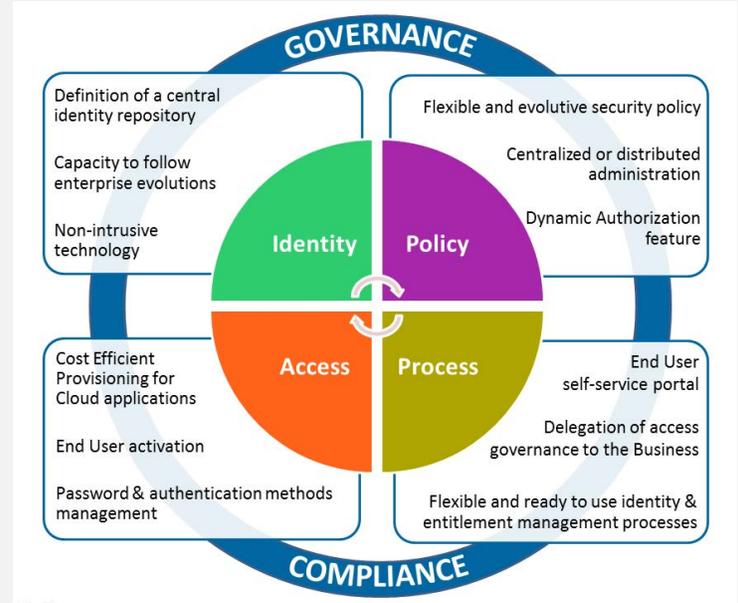

Enhanced user productivity while ensuring secure user access to web and mobile applications through single sign-on (SSO), session management, strong authentication, and context-based access policy enforcement.

Federated single sign-on (SSO), which helps enhance user productivity and facilitates trust through the delivery of SSO across separately managed domains, including easily configurable connections to popular software as a service (SaaS) applications.

Integration with IBM MobileFirst Platform, IBM MobileFirst Protect (formerly, MaaS360 by Fiberlink, an IBM company), IBM Security Trusteer Fraud Protection for easier mobile access development and rich mobile context for access decisions.

Better protection from advanced threats including OWASP top 10 web application risks.

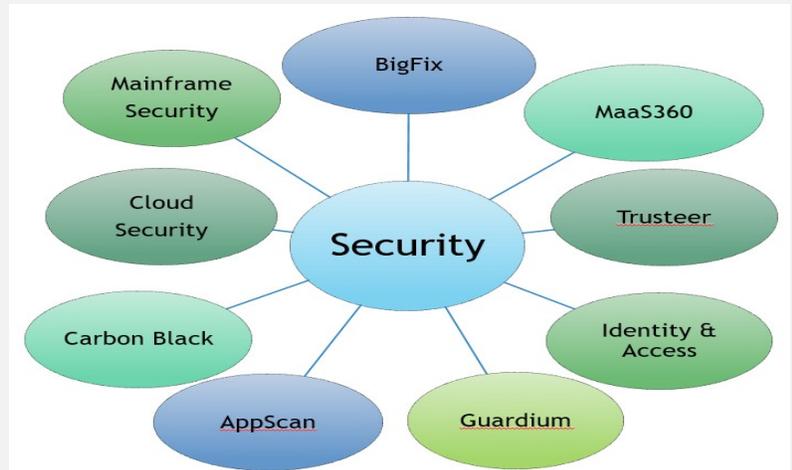

Access Manager helps centrally secure internal and external user access points into the corporate network from web and mobile channels. Highly scalable and configurable, the solution is designed to provide a policy-based user authentication and authorization system that helps defend against the latest web-based security threats.

Onexte is an IBM Security Certified Business Partner that is specialized licensing and implementing solutions to a broad of clients and Fortune 1000 Companies. We are authorized as a Solutions Provider and Implementation Partner for IBM Onexte provides Security Solutions, IT Services, SI, Cloud, and Mobility Solutions.

Why Choose Onexte?

Onexte has a comprehensive, state of the art Security Lab that offers clients Proof of Concept, custom development and testing. Our Security team is staffed by highly certified professionals who specialize in all elements of successful endpoint solutions and deployments. From specifying, installing and configuring your infrastructure, to helping you choose and deploy the elements that will make your environment secure, flexible and scalable. Onexte consultants can work with you every step of the way to ensure that you, your employees, your business partners and your customers can take full advantage of all the potential that IBM Security delivers.

> **Experience:** Onexte has worked with major organizations across various industries and across the country including financial services, healthcare, higher education and retail. The Onexte Security Team can help your organization be cyber resilient with the end-to-end management of security threats. We understand the security threat landscape and the necessary actions your organization needs to take to be in a defensible position.

> **World Class Facilities:** Onexte has a comprehensive, state of the art Security Lab that offers clients Proof of Concept, custom development and testing. Our Engineers and Architects are experienced and certified professionals who specialize in all elements of Security solutions and deployments.

> **Quality:** At Onexte, each project is assigned a quality controller who is typically another senior engineer that is not working directly on the project. The quality controller will review the project plan and SLA's and will ensure the project conforms to all agreed standards.

> **Flexibility:** From consulting, installing and configuring your infrastructure, to helping you choose and deploy the elements that will make your environment secure, flexible and scalable. The Onexte Security Team can work with you every step of the way.

> **Strategic Partnerships:** Onexte works with the leading security companies to co-build solutions and influence product direction. We bring industry-specific expertise by being involved with our partners' marketing- and customer-facing teams to accurately meet the needs of our customers.
