Protecting Small Businesses

Scalable Solutions

With CarbonHelix SMB, we are excited to offer affordable security solutions to businesses of all sizes. By specializing in the IBM® QRadar®, SentinelOne and other enterprise tools, we have been able to scale the same solutions used to protect large corporations without the large overhead. Our purpose is to improve attack detection, accelerate incident response and proactively harden defenses. CarbonHelix for SMB gives you peace of mind knowing you are secure, allowing you to focus on what is truly important.

All-Inclusive

CARBONHELIX

24X7 Threat Response

Network and User Behavior Analysis platform that provides situational awareness and response automation with a live human SOC within the U.S.

Endpoint Protection

SentinelOne delivers autonomous endpoint protection that prevents, detects, and responds to attacks across all major vectors.

Email Security

Cloud-native solution that eliminates the real-time risk of phishing across Microsoft 365 and G-Suite. Fully integrated and Simple layered defenses

Security Patching

Monitors every endpoint continuously to identify unpatched vulnerabilities and provide remediation capabilities

Analytics & Compliance

Event monitoring and analysis tools designed to address critical auditing and security requirements to meet compliance and provide enhanced correlation

Vulnerability Scanner

Complete and continuous scanning of your network, assets, and vulnerabilities - both on-premise and remote - that put your business at risk
